Photoshop is more than a graphics application — it's an image manipulation tool. You'll find much more to Photoshop than image editing. The program's learning curve can be difficult to overcome, but it is worth the time you put into it. Learning to work with layers Photoshop layers enable you to create the illusion of depth and transparency. Layers are objects that you place on top of other objects to create new layer groups. A layer is a raster object — the lines you draw are the pixels that make up an image — and a group of layers is also a raster object. To get a feel for Photoshop layers, try creating a simple texture layer and apply it to a new blank canvas. See Chapter 10 for the lowdown on creating and arranging layers. Picking up the key shortcuts Photoshop offers several keyboard shortcuts to help you speed up your work. You can change the shortcuts in the Keyboard panel (Windows) or the Photoshop Keyboard & Menus bar (Mac) to suit your style. Here are some of the most frequently used keystrokes: Double-click the leftmost icon in the menu bar to access layers toggling options. With the arrow keys, select and move objects. Use P to select the entire image on which you want to perform an action, and then choose from the onscreen options to apply the action. Shift+F toggles the layer visibility on and off. You can cycle through the available layer groups with the Tab key and cycle through the available layers by holding down the Ctrl key and choosing a layer. Understanding the different Photoshop file types When you create or open an image in Photoshop, you can save the resulting file as one of several different file types. The most popular file types are.psd (photoshop) and.psb

The driver was shot first, the rifle held tightly on his chest for a long moment before his body fell out of the cab. Startled by the shots, the horses reared up, making it difficult to fire at the rear of the cab, but the men in the cab discharged their pistols, killing the driver and wounding the bear hunter. Trooper John Brumley and six other New Mexico Highway Patrolmen surrounded the Mustang, and Johnson, who had been wounded in the battle, pointed his rifle at them. "One of them tried to get to Johnson but Brumley tackled him from the back. Two of the Highway Patrolmen took out their revolvers and fired, hitting him in the side and head." Johnson was found to have two bullet wounds to his upper torso, and surgeons at the University of New Mexico Hospital removed both bullets. The carnage of this tragedy was hard for officials to accept. State Commission chairman E. N. 'Algernon' Osgood admitted in the next day's edition of the Albuquerque Journal, "I am not very enthusiastic about this business. I don't care what the Governor says, when you are killed it isn't very pleasant." There would be no official explanation of what happened. Johnson and his companions, all from or near Albany, met at the Great Salt Lake Hotel in Clayton. Gunshots were heard in the street, and Johnson shouted, "Come on!" Two carloads of state troopers were sent in pursuit. Johnson's young brother Robert was among the first to join the pursuit, carrying a rifle. A few hundred yards farther, the rifle ran out of ammunition, and Robert Johnson climbed into the back of a large truck belonging to the town of Clayton
